

# WE STRIVE TO FIND THE BEST ENERGY SOLUTION FOR EACH OF OUR CUSTOMERS.

From money savings to system performance, read why our partners trust Secure Solar Futures with their energy needs.

*Our first round of solar schools has already started saving money on energy. After the quick success of our first round of solar schools, we decided to expand the program to additional campuses. The second round of solar will also help us save money on energy. But it will add roof restoration that will save even more money by avoiding millions of dollars in costs to remove and replace older roofs.*

—JEFF SHAWVER, SENIOR DIRECTOR OF PHYSICAL PLANTS, ROANOKE CITY PUBLIC SCHOOLS

*Going solar supports our mission. It will save us money that we can put back into programs for the community while also doing our part to help the environment.*

—SHAWN DURHAM, CEO, FOUR SEASONS YMCA, TAZEWELL, VA

*Not only does solar power help the university address its significant commitment to environmental sustainability, but our agreement with Secure Solar Futures also allows us to reduce our utility expenses.*

—DAVID HALE, VICE PRESIDENT FOR BUSINESS AND FINANCE, UNIVERSITY OF RICHMOND

*Since we don't have a dedicated fund for anything more than minor roof repairs, the roof restoration meant that we were able to get three of our schools' roofs restored and guaranteed for 25 years and avoid the larger cost of replacing those roofs.*

—DOUG ARNOLD, PROJECT SPECIALIST, ORANGE COUNTY VA PUBLIC SCHOOLS

*I had been looking at going solar for a long time, but as a nonprofit, we were very risk-averse, and it didn't seem financially viable until we read about Secure Solar Futures in the news. Our solar array performs well, and it produces more power than we even expected. It's a boring system—it works well, so we don't have to think about it. You don't go home and talk about how great your garbage disposal system works. A boring system is a good system.*

—RAUL ARBELAEZ, VICE PRESIDENT, INSURANCE INSTITUTE FOR HIGHWAY SAFETY, RUCKERSVILLE, VA
